NAG Fortran Library Chapter Contents

G11 – Contingency Table Analysis

Note: please refer to the Users' Note for your implementation to check that a routine is available.

G11 Chapter Introduction

Routine Name	Mark of Introduction	Purpose
G11AAF	16	χ^2 statistics for two-way contingency table
G11BAF	17	Computes multiway table from set of classification factors using selected statistic
G11BBF	17	Computes multiway table from set of classification factors using given percentile/quantile
G11BCF	17	Computes marginal tables for multiway table computed by G11BAF or G11BBF
G11CAF	19	Returns parameter estimates for the conditional analysis of stratified data
G11SAF	12	Contingency table, latent variable model for binary data
G11SBF	12	Frequency count for G11SAF
