Summary – Patch Board

Description

This E-block contains a small patch board for developing circuits and projects. Connectors for two E-block ports allows prototype wires and leads to be connected to the rows and columns on the prototype board.

This E-block is used where there is a requirement to set up semi-permanent dedicated E-blocks. This E-block is supplied in kit form – the D-type connectors need to be soldered into place.

Features

- 40 * 18 hole proto area
- Separate lines for power rails

Patch Board Layout

- 1 9 Way D-type Socket
- 2 9 Way D-type Socket
- 3 Screw Terminal
- 4 Pin connector for D-type socket
- 5 Pin connector for D-type socket
- 6 Patch area

Where to find more information

On the ELSAM 1.4 CD, which is provided with all 'upstream' devices (i.e. Multiprogrammer), is the relevant information for the product. It is in the E-Blocks directory, which includes the following documents: -

- o Installation guide.doc
- o Getting started with E-Blocks.pdf
- o Patch Board folder – which contains datasheet
