Subject: Plasma Science and Technology - Decision on Manuscript ID PST-2023-0199.R1

Body: 15-Sep-2023

Dear Dr. Micozzi:

Thank you for your submission!

Manuscript ID PST-2023-0199.R1 entitled "Final results of the first phase of the PROTO-SPHERA experiment: obtainment of the full current stable Screw Pinch and first evidences of the jet + torus combined plasma configuration" which you submitted to the Plasma Science and Technology, has been reviewed. The comments of the reviewer(s) are included at the bottom of this letter.

Your manuscript PST-2023-0199.R1 is about to be accepted. Before that, you need to revise your manuscript according to editors' comments (see below)

Editors' Comments to Author:

1, Please check and polish your English carefully and make sure there are no typos and grammatical errors in your article. We made some annotations and revisions on your article (see attached file in the email sent last month). Please modify your article according to these annotations, and let us know if any revision deviates from your original intention or scientific meaning.

2, Please check each reference and make sure all of them are correct. We have checked the references of your article and made some revision on the form, so please replace the references one by one in the manuscript with the revised ones (see attached file in the email sent last month). Some references could not be found by us or have a lack of information, please send the full text of the literature or give the link.

3, In consideration of the requirement of the publication later, please upload the source files of all the figures in TIFF, EPS, jpg or other format with high resolution (≥ 300 dpi).

4, Please send us the scanning file of the filled and signed copyright transfer form (attached in the email sent last month).

Please modify your article in the version we sent to you in the e-mail because we have made

some modifications in the format of your article. Please send clean versions of your revised manuscript in both word (or latex) and PDF through email, and also attach all the files required above.

To revise your manuscript, log into <https://mc03.manuscriptcentral.com/pst> and enter your Author Center, where you will find your manuscript title listed under "Manuscripts with Decisions." Under "Actions," click on "Create a Revision." Your manuscript number has been appended to denote a revision.

You may also click the below link to start the revision process (or continue the process if you have already started your revision) for your manuscript. If you use the below link you will not be required to login to ScholarOne Manuscripts.

*** PLEASE NOTE: This is a two-step process. After clicking on the link, you will be directed to a webpage to confirm. ***

https://mc03.manuscriptcentral.com/pst?URL_MASK=0de9c86362e64ba4b5a8ed6ffafe1770

Please upload the final version and electronic source files to your Author Centre before the deadline of 30-Sep-2023.

If we do not receive your revised article by this date, it may be treated as a new submission, so please let us know if you will need more time.

Please note that if the Editorial Board are not satisfied with the changes to your article, it may still be rejected.

IMPORTANT: Your original files are available to you when you upload your revised manuscript. Please delete any redundant files before completing the submission.

Because we are trying to facilitate timely publication of manuscripts submitted to the Plasma Science and Technology, your revised manuscript should be uploaded as soon as possible. If it is not possible for you to submit your revision in a reasonable amount of time, we may have to consider your paper as a new submission.

Once again, thank you for submitting your manuscript to the Plasma Science and Technology and I look forward to receiving your revision.

Sincerely yours,
Editor: Dr. Cheng Yang
Editorial Office of Plasma Science and Technology
yangc@ipp.ac.cn

Reviewer(s)' Comments to Author:

Reviewer: 2

Comments to the Author

The authors have sufficiently considered my comments. The figure quality has also been improved. That is good. I am in support of a publication.

Reviewer: 1

Comments to the Author

The concerns outlined in the previous reviewing comment have been well addressed in this revised manuscript. The novel experimental results and contributions to the related field presented in this manuscript meet the criteria for journal acceptance. I suggest that this revised manuscript is suitable for publication in its present form.
