Within the project, the lack of linguistic quantitative software able to process adequately UNICODE fonts employed in the e-texts, lead to the substitution of the following characters:

```
ř --> ř
t --> v
ř --> e
b --> h
```

Other graphic conventions:

```
__ "erasure without text"
=abc= "text over erasure"
/abc/ "text omitted by the scribe and added
by scholars"
//abc// "text mistakenly added by the scribe"
```

Akkadian is written in lower case.

Sumerian logograms in CAPS.
