

NAG Library Manual, Mark 22

Contents

	Volume
Foreword	1
Introduction	
Essential Introduction	1
NAG Fortran Library specific documentation	
Mark 22 NAG Fortran Library News	1
NAG Library for SMP & Multicore specific documentation	
Introduction to the NAG Library for SMP & Multicore	1
Mark 22 NAG Library for SMP & Multicore News	1
Tuned and Enhanced Routines in the NAG Library for SMP & Multicore	1
Thread Safety	1
Library Contents	1
Routines Withdrawn or Scheduled for Withdrawal	1
Advice on Replacement Calls for Withdrawn/Superseded Routines	1
Acknowledgements	1
Online Documentation	1
Indexes	
Indexes	1
Implementation-specific Information	
Implementation-specific Information	1
Chapters of the Library	
A00 – Library Identification	1
A02 – Complex Arithmetic	1
C02 – Zeros of Polynomials	1
C05 – Roots of One or More Transcendental Equations	1
C06 – Summation of Series	1
C09 – Wavelet Transforms	2
D01 – Quadrature	2
D02 – Ordinary Differential Equations	2/3
D03 – Partial Differential Equations	3
D04 – Numerical Differentiation	4

D05 – Integral Equations	4
D06 – Mesh Generation	4
E01 – Interpolation	4
E02 – Curve and Surface Fitting	4
E04 – Minimizing or Maximizing a Function	5/6
E05 – Global Optimization of a Function	
F – Linear Algebra	7
F01 – Matrix Operations, Including Inversion	7
F02 – Eigenvalues and Eigenvectors	7
F03 – Determinants	8
F04 – Simultaneous Linear Equations	8
F05 – Orthogonalisation	8
F06 – Linear Algebra Support Routines	9
F07 – Linear Equations (LAPACK)	9/10
F08 – Least-squares and Eigenvalue Problems (LAPACK)	11/12
F11 – Large Scale Linear Systems	13
F12 – Large Scale Eigenproblems	13
F16 – Further Linear Algebra Support Routines	13
G01 – Simple Calculations on Statistical Data	14
G02 – Correlation and Regression Analysis	14/15
G03 – Multivariate Methods	15
G04 – Analysis of Variance	15
G05 – Random Number Generators	16
G07 – Univariate Estimation	16
G08 – Nonparametric Statistics	16
G10 – Smoothing in Statistics	16
G11 – Contingency Table Analysis	17
G12 – Survival Analysis	17
G13 – Time Series Analysis	17
H – Operations Research	17
M01 – Sorting and Searching	18
P01 – Error Trapping	18
S – Approximations of Special Functions	18
X01 – Mathematical Constants	18
X02 – Machine Constants	18
X03 – Inner Products	18
X04 – Input/Output Utilities	18
X05 – Date and Time Utilities	18
